

PRETREATMENT EQUIPMENT

 defender®

FOR TRANSPORT,
DOSING AND CAKING
OF WASTE.

Process

It consists of an endless screw that rotates on its own axis thus displacing the materials towards the discharge.

- Manufactured in carbon steel and stainless steel AISI 304 or AISI 316.
- Adaptable to the installation needs.
- The installation does not require civil works or large spaces.
- High durability, resistant to oxidation and corrosion.
- No clogging or obstructions.
- High transport capacity.

ADVANTAGES

- Wide range of models designed and tested by Toro Equipment, manufactured in 304 and 316 stainless steel.
- Guaranteed against material or manufacturing defects, under normal use and maintenance conditions.
- Defender® equipment can be combined with each other, according to the needs for an optimal treatment.
- Easy and fast installation, implementation in reduced spaces.
- Easy and quick maintenance.
- The equipment is always packed in shrink-wrapped material and optionally in treated wood packaging.
- Toro Equipment offers start-up and after-sales service, please contact us.
- **Applications:** paper mills, tanneries and textiles, food, urban, wineries, fish, meat, high oil content, canneries, laundries, dairies, biodiesel...

Particle-size test of a sample from a DA Defender® installed in a plastics factory.

Compactor Screw | Models

TC COMPACTOR SCREW

Compact equipment that performs several functions in the process of removing solids from urban and industrial wastewater treatment plants, minimizing their moisture content and volume.

Special application in the treatment of solids from screening and roughing processes, helping to achieve greater dryness in the output waste.

Sand Remover | Models

DA SAND REMOVER

It consists of a sand trap made of GRP or stainless steel and a hollow shaft screw that collects and transports the solids, achieving a 97% grit removal rate.

High efficiency in WWTP of discharges with high grit content, for example, in potato and beet processing.

Compact Pretreatment Plant | Models

PPC COMPACT PRETREATMENT PLANT

Compact wastewater pretreatment unit that integrates in a single unit a TTC and a DA, thus performing several processes: roughing, desanding and degreasing. Highly efficient equipment for wastewater pretreatment.

• To achieve a high quality in our products and services, in Toro Equipment, we have developed and implemented a Quality Management System according to the UNE-EN-ISO 9001 standard, adapted to the needs of the company and is continuously improving the procedure.

• The system is based on a continuous monitoring of all the activities developed in the company:

- Design
- Manufacturing
- After-sales service

• The electrical panel includes as standard, Start/Stop, limit switch to stop the drum when the safety cover is lifted, support to hold it, emergency stop and automatic programming of the cleaning system.
